Big Data Service and Network Infrastructure

Tuesday, 17 September 2019 15:45 (30 minutes)

Big Data and Digital Technology are new eras in the world, many activities in our lives have a strong relationship to each other in this new era, whether in the government, industry, business, or education sectors. In this talk I would like to talk about big data and digital services as a new big business opportunity in Indonesia and look at the network infrastructure as the main carrying capacity of these services.
