

Session 4 Hands-on Activities: Ionosphere and Equatorial plasma bubble: computer analysis

Friday, 29 July 2022 15:00 (1h 30m)

In this session, we will study the characteristics of Slant TEC and Vertical TEC (VTEC) at Chiangmai GNSS station and compare with the TEC from the IRI model. In addition, we will investigate the Kp index (disturbance to Earth's magnetic field) on those days.

This session is completed. For the video record of the Hands-on activity of this session please find at the link <https://www.youtube.com/watch?v=Yt481zYDne8>
