

# Welcome Speech:

**The Second ThaisCube workshop,  
organized by the National Astronomical Research Institute (Public Organization) in  
collaboration with Chiang Mai University  
8th to 11th August 2023 at the Ibis Styles Chiang Mai Hotel.**

---

Good morning to all invited speakers and participants. I would like to extend a warm welcome to everyone attending the Second ThaisCube workshop, which is being organized by the National Astronomical Research Institute in collaboration with Chiang Mai University. This workshop is a great chance for students and young scientists in the country to explore cosmic rays, gamma rays, neutrinos, and related detectors in-depth.

The Second ThaisCube workshop follows the success of the First ThaisCube workshop. This time, we're going international to give young minds the opportunity to interact directly with IceCube experts. A big thank you to all the invited speakers for accepting our invitation to come to Thailand to share your knowledge with our enthusiastic Thai youth. I truly appreciate it!

Program Management Unit for Human Resources & Institutional Development, Research and Innovation (also known as PMU-B) is delighted to provide its support to this workshop through the research project entitled "Promotion of Thai Researchers to Play an Important Role in Global Leading Partnership with the IceCube Neutrino Observatory for High-Energy Particles from Space."

It's time for us to come together and start learning. I firmly believe this workshop will successfully achieve all the project's goals. Thank you all for being part of this beautiful experience. Let's make the most of this opportunity to learn and grow together. Thank you!
